

Notice of Public Open House

The City of Belleville Wet Weather and Wastewater Servicing Master Plan

The City of Belleville has initiated a Master Planning process in accordance with Approach 1 of the Municipal Engineers Association (MEA) Class Environmental Assessment (Class EA) to develop a wet weather and wastewater servicing master plan.

How Will This Affect Me?

The Master Plan study is evaluating various alternatives to improve the performance and reliability of the wastewater collection and treatment systems in both the short and long term. The wastewater system is being reviewed as a whole, such that a strategic plan of actions can be implemented over a logical time period and in a prioritized fashion.

We Want To Hear From You!

Public consultation is a key component to this study. The proposed consultation plan provides for a single Public Open House to review a number of servicing alternatives that are being considered. This Public Information Centre will identify existing system constraints and potential alternative solutions. The preferred servicing solution currently being considered involves a series of capacity and condition upgrades in the wastewater collection system and the Belleville Wastewater Treatment Plant.

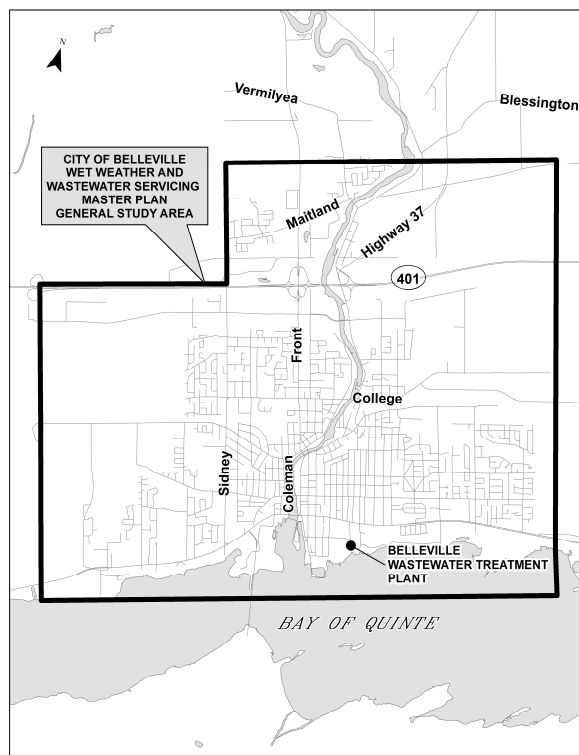

The Open House is scheduled as follows:

Date: Thursday, July 25, 2019
Time: Open House from 6:00 – 8:00 p.m.
Location: The Banquet Centre - Central Rm.
1 Alhambra Square, Belleville, ON K8N 5V7

If you have any questions regarding the study please contact one of the people listed below. We welcome your feedback.
