

REQUEST FOR COMMENTS

Proposed New Policies for new Subdivisions in the City of Belleville

The City of Belleville is considering 4 new policies that would be applicable in the future to the development of any new subdivision within the municipality.

These draft policies are:

1. [tree planting in new subdivisions;](#)
2. [parkland policies for new subdivisions;](#)
3. [tree cutting by-law;](#)
4. [site alteration by-law.](#)

(Copies of each of the policies are available by clicking on the list above or from the Approvals Section of the Engineering and Development Services Department located on the 2nd floor of Belleville City Hall)

For each of the draft documents, there are 2 aspects, that being the policy itself and secondly the implementation or technical aspects of the policy.

Comments from the residents of Belleville on these four documents would be most appreciated. Needless to say, there may be disagreement with a policy in itself and comments to that effect are also important.

The plan is to submit a report on each of these four policies to the City's Planning Advisory Committee at their meeting to be held on September 8, 2015.

At that time, the results of all the feedback that Staff has received will be presented to the Committee along with recommendations for going forward.

To be able to include the public comments in the agenda and applicable report, any comments are requested by Friday August 28, 2015.

Please feel free to contact the undersigned any time about the proposed policies or the development of new subdivisions within the City of Belleville.

Comments can be emailed to the undersigned or dropped off at the Approvals Section located on the 2nd floor of Belleville City Hall.

Thank you for your assistance with this request and your input.

Spencer Hutchison
Manager of Approvals
