

Pavement Condition Index Summary

(From 2009 Dillon Report)

Condition Index Summary of the City of Belleville's 1700 Road Sections*

(*Segments combined where PCI identical on same roadway stretch)

| <u>PCI Range</u> | <u>Category</u> | <u># of Sections</u> |
|------------------|---------------------|----------------------|
| 0-4.0 | Reconstruction | 33 |
| 4.1-6.5 | Overlay (Resurface) | 610 |
| 6.6-10 | No Intervention | 1057 |

The Pavement Condition Index is determined by a road side evaluation. Road class (Local/Collector/ Arterial) and traffic volume are factored in when calculating the Pavement Condition Index number.

Example: A new road with perfect pavement will have a high PCI number.
