The City of Belleville has initiated a Municipal Class Environmental Assessment to evaluate alternative routes for extension of College Street East and associated servicing of lands west of Bell Creek (refer to the study area map below). The extension would facilitate future development in the North East Industrial Park area.

The study will proceed in accordance with the Municipal Class Environmental Assessment, October 2000, as amended in 2007 - Schedule ‘B’. Various route alternatives for extension of College Street East will be analyzed and evaluated, in addition to servicing options for the areas available for industrial development.

Public input during the study is encouraged. A Public Information Package will be provided to all stakeholders during the study to provide additional information, identify the alternative options being evaluated, and solicit feedback and comments. Upon completion of the study, a Project File Report will be made available for public review and comment.

If you have any comments or questions or require any further information about the study or the Municipal Class Environmental Assessment process, please direct them to either of the persons listed below.
