Notice of Public Information Centre Meeting
Extension of Station Street and Haig Road
Municipal Class Schedule ‘B’ Environmental Assessment

The City of Belleville is conducting an Environmental Assessment (EA) to examine the extension of Station Street and Haig Road; a new collector road link project identified in the City’s Official Plan and Transportation Master Plan, to permit additional residential and non-residential development in the Stanley Park Development area.

The study will document the transportation need and define the new form and function of the road in the community. The Recommended Plan will address current and future operational needs considering all modes of travel. This roadway will be a long term link that will change local travel for vehicles, bicyclists and pedestrians for future travel. The roadway extension reflects the changing urban form of the City and the new transformation of land development in the Stanley Park Development area.

The project is being planned as a Schedule ‘B’ project under the Municipal Class Environmental Assessment (2007) document, as amended in 2011. Should either the magnitude of environmental effects be great or the proposed capital costs of the project exceed $2.3M, the project will be elevated to a Schedule ‘C’, requiring a second Public Information Centre (PIC) meeting.

The EA Study will confirm the project need and justification, document existing environmental conditions, examine alternatives and define the roadway design. This information will be presented on display boards at a PIC meeting to be held as follows:

**Wednesday, July 23, 2014**
Build Belleville Centre
116 Pinnacle Street
Belleville, ON
4:00 – 7:00 pm

There is an opportunity at any time during the EA process for interested persons to provide comments. Any comments received pertaining to the study will be collected under the Environmental Assessment Act and, with the exception of personal information, will become part of the public record.

For more information, or if you wish to be placed on the study’s mailing list, please contact:
