STORM SEWER CONSTRUCTION $400,000
ROADWORK $350,000

TOTAL PROJECT COST ESTIMATE: $1,575,000

INVESTING IN OUR COMMUNITY

BELLEVILLE in the Bay of Quinte
• This is a combined sewer separation project which includes new storm sewers and replacement of sanitary sewers.

• Sewer separation projects reduce the wet weather load on the wastewater treatment facility by directing storm water to a more suitable outlet such as an existing storm sewer system, drainage channel or water body.

• The street will be reconstructed with new asphalt paving and concrete curb and gutter.

• The existing watermain and sanitary sewer will be replaced, complete with new services installed to the property line.
PUBLIC INFORMATION CENTRE
ON STREET PARKING

- The reconstructed road will accommodate two lanes of traffic with parking on one side.

- Since parking can only be accommodated on one side of the road, it is necessary to address on street parking as part of this project.

- "Proposed parking restrictions" are presented on the following board for public comment.
