The City of Belleville has initiated a Master Plan study to address water pressures and system flow requirements for the Cannifton planning area in the City of Belleville to meet planning area needs. The objective of the study is to develop and evaluate alternative solutions that will provide adequate pressure and system flows to the Cannifton planning area based on near-term, mid-term, and full build-out development scenarios.

The study will proceed in accordance with the Municipal Class Environmental Assessment, October 2000, as amended in 2007 – Master Plan.

A Public Information Center (PIC) has been scheduled to present preliminary study findings, answer questions regarding the project, and solicit public feedback and comments.

PIC#1 will take place on:

Date: Thursday, October 27, 2011
Time: 6:30 pm to 8:30 pm
Location: Parkdale Community Centre
119 Birch Street,
Belleville, Ontario

Public input throughout the study is encouraged. With the exception of personal information, all comments received will be part of the public record. Upon completion of the study, a Master Plan Report will be made available for public review and comment.

If you have any comments or questions, or require any further information about the study or the Municipal Class Environmental Assessment process, please direct them to either of the persons listed below.
